

2011 PhD SCHOLARSHIPS

AIMS@JCU, a joint venture between James Cook University and the Australian Institute of Marine Science, two of the world's most eminent tropical marine research institutions, is seeking postgraduate students. AIMS@JCU will offer up to eight scholarships for domestic or international PhD students commencing in 2011. Scholarships will be competitive and recipients will undertake high quality research in the field of marine science.

AIMS@JCU scholarships may be awarded for stipends (at the Australian Postgraduate Award level) or project costs, depending on the needs of individual students and projects. Projects must be jointly supervised by scientists from both institutions. Fields of research are open but should fall within areas of strength of the two partner institutions. This includes but is not limited to:

Coastal ecology
Coral reef research
Marine chemistry
Marine climate research
Marine engineering & technology
Marine microbiology
Marine molecular sciences
Oceanography
Tropical aquaculture
Stress in tropical marine systems
Coastal processes/
Physical processes

Interested students are encouraged to contact potential supervisors at AIMS and JCU immediately to meet JCU application deadlines (31 August 2010 for international students; 31 October 2010 for domestic students).

When applying students should indicate they are applying for an AIMS@JCU scholarship by writing this information into the list of scholarships applied for.
